Objective

My objective is to make an impact in the field of software and app development and information technology in general. I am always trying to hone my skills as a developer and constantly learning new things and to try and be as effective as I possibly can. I am a quick learner, I can adapt fairly quickly, I can communicate and I am able to work on my own and with others. I plan on becoming a full stack developer in the future and am constantly working towards that goal.

SKILLS

JavaScript, CSS, HTML, Python (basic), Java (basic), SQL, Word, PowerPoint, Excel, React (intermediate), Docker (basic), Firebase, GIT, Azure, AWS
